positive regulation of peptidyletyrosine phosphorylation

positive regulation of protein kinase activity

regulation of peptidyl-tyrosine phosphorylation

regulation of tumor necrosis factor superfamily cytokine production

tumor necrosis factor production

negative regulation of angiogenesis

tumor necrosis factor superfamily cytokine production

regulation of tumor necrosis factor production

reactive oxygen species metabolic process

cellular response to biotic stimulus

negative regulation of vasculature development
 cellular response to molecule of bacterial origin

negative regulation of blood vessel morphogenesis

cellular response to lipopolysaccharide
